Greens Silage

Protein. Wrapped in Quality

Pure, Fresh & Nutrient-Rich

Our corn silage bales are compressed and air-tight wrapped fermented corn fodder, specially prepared to deliver balanced nutrition, high energy, and year-round feed security for cattle, buffalo, goats and other ruminants.

Our process ensures maximum nutrient preservation, long shelf life, and ease of handling, making it the perfect fodder solution for modern dairy farms.

Why Choose Corn Silage Bales ?

Our bales are prepared using scientific fermentation methods, which enhance digestibility, improve palatability, and preserve essential nutrients like starch, protein, fiber, vitamins, and minerals.

This ensures your cattle receive a balanced diet that translates into higher milk yields, better fertility, and improved overall health.

Greens Silage

Protein. Wrapped in Quality.

Features & Key Benefits

High Energy Feed

Rich in starch and fiber for improved milk yield & faster weight gain.

Nutrient Preservation

Airtight wrapping locks in freshness, vitamins & minerals.

Improved Digestibility

Fermentation enhances taste and intake.

Year-Round Availability

Assured fodder supply in all seasons.

Convenient Handling

Easy-to-transport compressed bales.

Long Shelf Life

Remains fresh up to 6 months (unopened).

Reduced Wastage

Airtight wrapping prevents spoilage, mold & pests.

Boosts Productivity

Promotes growth, fertility, and strong animal health.

Greens Silage

Protein. Wrapped in Quality

Uncompromised Quality, Guaranteed Nutrition

- 🌽 Produced from carefully selected, fresh green corn crops.
- 🌽 Processed using modern chopping & compression technology.
- 🌽 Fermented under controlled conditions for consistent quality.
- 🌽 100% natural – No chemicals, additives, or preservatives.
- 🌽 Hygienically handled and packed to maintain freshness.

Suitable For

providing year-round balanced nutrition that improves productivity, fertility, and animal well-being

- ✦ **Dairy Cows** (Boosts milk yield & fat content)
- ✦ **Buffaloes** (Improves energy & fertility)
- ✦ **Beef Cattle** (Faster weight gain & growth)
- ✦ **Goats & Sheep** (Enhanced digestibility & nutrition)

Greens Silage

Protein. Wrapped in Quality.

Packaging & Storage

- **Form:** Compressed Fermented Bale
- **Net Weight:** 50–60 kg (customizable)
- **Gross Weight:** Varies with wrap
- **Shelf Life:** Up to 12 months (if unopened & stored properly)
- **Storage Instructions:**
Store in a cool, shaded place.
Keep wrap sealed & undamaged.
Once opened, use within 2–3 days.

How to Use

- Cut open the wrap carefully.
- Take out the required amount of silage.
- Feed directly to cattle — no cooking or processing needed.
- Cover or reseal unused silage to reduce exposure.

Your Animals Deserve the Best

Strong, healthy, and productive livestock start with quality nutrition. With our Premium Corn Silage Bales, you can ensure a steady, cost-effective, and nutrient-rich feed for your cattle all year round.
